PERF/12

AUTOMATIC PERFORATING MACHINE FOR 12 RIBBONS

AUTOMATIC PERFORATING MACHINE CLASS PERF/12

Automatic perforating machine for thermoadhesive nonwoven ribbons. The PERF/12 can process up to 12 ribbons, normally for the internal reinforces of the waistband or for thermoadhesive garment reinforcements and edge control ribbons.

TECHNICAL FEATURES

- Unwinding device for 12 ribbons with roll end microswitch for each roll as standard.
- Perforating machine with low noise crankshaft mechanism including easy adjustment of the perforating pitch whilst the machine is running.
- Pneumatic adjustable puller for feeding the fabric.
- Rewinding device for 12 ribbons with a built-in, clutch mechanism for each rewinding shaft to give perfect results for each type of material.
- Mold with 3 adjustable rectangular dies, 25 x 2 mm with an independent adjustment of the distance between the punches
- Punches 25 x 1 mm or other dimensions are available on request.

An additional fourth punch available on request

- Adjustable perforating speed up to 440 cycles/min (slow start to maximum speed).
- PLC controlled machine.

DEVICE ON REQUEST

- PERF12/CNT Digital electronic meter counter

TECHNICAL DATAS

- Perforation pitch:from 10 to 50 mm
- Ribbon width:from 20 to 150 mm
- Max roll diameter:300 mm
- Installed power:1,5 kW 400V 50Hz 3-phases (other voltages on request)
- Dimensions and net weight:5500 x 800 mm, 920 Kg
